Dear NewsCred,

   I have completed my B.Sc. Engineering degree from Computer Science & Engineering Department, Rajshahi University in October 2017. I am currently looking for an internship related to software engineering in a major company. I am looking for job experience as a software engineer. I have a good knowledge in Competitive programming, Database, Data Structure & Algorithm. I am very much egger to learn from your company and want to do something creative.

I consider that my interests match with your requirement and I want to apply for this position. I believe I am the one who has the skill set you are looking for to fill the position of software engineer internship in your company. I am very much egger to get the opportunity, and I am also available to discuss how my educational and programming experience will be helpful and useful for your company. For any query you can contact with me on phone and email. Thank you for your attention and consideration.

Sincerely,
Sourav Paul
